Complete Bundle

End-to-End Protection for Email, Web, Identity & Users
The Complete Cybersecurity Bundle provides comprehensive protection across your entire digital infrastructure. This all-in-one solution integrates next-gen email security, DNS filtering, Microsoft 365 and Entra ID backup, phishing protection, user training, and compliance-ready email archiving arming your business and users with a robust, multi-layered defense against modern threats.

Bundle Components

1. Advanced Email Security (MX +ICES Integration)

»   Dual-layer protection: Gateway filtering + Microsoft 365 API-level scanning
»   Defends against phishing, malware, ransomware, and spoofing
»   Augments Microsoft EOP and Defender, protecting internal and external traffic

2. DNS & Web Filtering

»   Blocks access to malicious, inappropriate, or high-risk websites
»   Time-of-click protection breaks the phishing chain before users reach harmful sites
»   Set policies to block malware-prone categories (e.g. gambling, adult content)

3. Microsoft 365 & Entra ID Backup

»   Immutable backups for Exchange, OneDrive, SharePoint, Teams, and OneNote
»   Protects Microsoft Entra ID (Azure AD): users, roles, groups, and policies
»   Rapid, granular recovery for business continuity and regulatory needs

4. Security Awareness Training & Phishing Simulations (SAT)

»   Behavior-driven training modules and real-time simulated phishing attacks
»   Launch campaigns in minutes with pre-built templates
»   Automated monthly reporting for visibility and performance tracking

5. Email Archiving

»   Secure, searchable archiving for compliance and legal hold
»   Supports right-to-be-forgotten and retention policies for GDPR, HIPAA, SOX, FINRA
»   Fast, searchable archives (2–3 second average response time)

Technical Highlights

»   Phishing Detection: AI & ML analysis + curated threat feeds
»   Auto Remediation: Instant inbox threat removal + cross-tenant remediation
»   Instant Backup: Granular restore, 100% cloud-native, ransomware-resistant
»   DNS Filtering: AI-enhanced categorization and real-time blocking
»   Security Training: Preconfigured SAT campaigns with phishing simulation
»   Email Archiving: Legal discovery-ready, supports retention + compliance needs

Complete Bundle

End-to-end Cybersecurity Suite

Email Archiving

Web Filtering

Why Choose the Complete Bundle?

Feature	Benefit
All-in-One Security	Consolidates critical cybersecurity services in a single, integrated bundle.
Next-Gen Threat Detection	LLM and ML-powered phishing and malware protection.
Granular Recovery of Email	Precision, speed, and efficiency when recovering specific data without having to restore entire mailboxes or archives.
DNS-Level Protection	Ensures access to malicious sites are blocked, thwarting malware and breaches.
Automated Backups	With automated backups for Microsoft 365 and Entra ID, you can quickly recover from accidental deletions, misconfigurations, or cyber threats.
Human Firewall	Educates users to recognize and avoid social engineering attacks.
Regulatory Compliance	Built-in email archiving and data protection tools
Simple Ease of Use	Built to ensure fast onboarding with an easy-to-use interface.

Business Email Compromise (BEC) Protection

The Phishing Protection solution, included in the bundle, uses real-time AI-powered threat detection to stop:

» Spear phishing & invoice fraud

» CEO impersonation attacks

» Supply chain compromise

Compliance Ready

» Designed to support frameworks such as: HIPAA, SOX, GDPR, SEC,

» FINRA Built-in email archiving, role-based access, and data recovery

» options

Secure Everything – From Click to Cloud

The Complete Cybersecurity Bundle empowers ITteams and MSPs todeliver unmatched security, compliance, and peace of mind without the complexity of multiple vendors.

Secure your organisation today.
