Protect Bundle

The 'Protect' Bundle delivers comprehensive email and identity protection including MX and ICES filtering with Microsoft 365 and Entra ID backup & recovery. It combines perimeter and mailbox-level security with seamless Microsoft 365 integration, providing 360-degree defense against phishing, malware, and evolving threats. Included is an immutable, ransomware-resistant backup for Microsoft Entra ID (Azure AD), enabling fast, effortless recovery whenever needed. Protect your inbox from internal and external threats - before, during, and after an attack.

What the Protect Bundle Includes:

Powerful Email Protection

ICES and MX solutions provide advanced protection against phishing, business email compromise (BEC), malware, and ransomware, threats that traditional email filters often miss.

AI/ML Detection

The 'Protect Bundle' uses machine learning to detect anomalies and emerging threats, providing smarter, real-time protection.

Restore Data in Seconds

With automated backups for Microsoft 365 and Entra ID, you can quickly recover from accidental deletions, misconfigurations, or cyber threats.

Microsoft 365 Backup

Get full-suite protection for Exchange, SharePoint, OneDrive, Teams, and OneNote. If users lose access to apps like Microsoft 365, we make restoration easy and remove any delays.

Entra ID Backup (Azure AD)

Protect all critical identity data, including users, groups, roles, and policies, ensuring business continuity and compliance.

Advanced Microsoft365 Security

Integrated with M365, it scans all emails (internal and external), augmenting EOP and MS Defender for unbeatable phishing protection.

Augments EOP and MS Defender

- » Strengthen M365 security measures.
- » Native and API-Based Integration Seamless
- » communication and compatibility.

Key Benefits

- » Layered protection – Combines gateway email defence with M365 API level security
- » Zero day & click time URL protection – Real-time analysis prevents new and latent threats
- » Microsoft365 Backup & Entra ID Backup - With automated backups for Microsoft 365 and Entra ID, you can quickly recover from accidental deletions, misconfigurations, or cyber threats.
- » Simple deployment & use – Cloud-based, multi-tenant SaaS with centralised management
- » SMB ready – Bundles are designed for SMBs to deploy and start protecting users instantly.
- » Post-delivery remediation – Automatically remove malicious emails from mailboxes

Layered Security in a Bundle

Users are the first line of defense in an organisation. Organizations require multiple layers of cybersecurity to protect their business from ever-evolving threats.
