Behavior-Driven Security Awareness Training

Effectively Turn Your Staff Into a Living Firewall and Mitigate the Most Common Cyberthreats

The weakest link in security is almost always the humans, not the technology. Simply put, people make mistakes that machines aren't capable of making. This is why social engineering and phishing attacks continue to climb the ranks as the **most common** and **most effective** means of hacking an organization.

A human challenge requires a people-centric solution... and we've got your team covered.

REDUCE SECURITY RISKS UP TO 92% BY INCREASING YOUR STAFF'S AWARENESS

- Adapts crucial security training activities to each employee's behavior

- Comprehensive library of cybersecurity training videos, quizzes, and courses

- Short quizzes minimize impact to employee productivity while gamification keeps them engaged and maximizes uptake

- Simulate phishing attacks to test your organization's readiness

Thousands of users trust our solution for simple, effective, low-cost cybersecurity awareness training.

A proven way to address the most common cyberthreats that your business will face.

A Necessary Part of Layered Cyber Defense
Our Solution Checks Every Box

SIMPLICITY

✓ Easy setup -- start running phishing simulations within 30 minutes of installing

✓ Seamless MS365, G-Suite, Teams, Azure, and SSO integrations

✓ Hassle-free reporting to satisfy compliance requirements

SECURITY

✓ Real-time security awareness training combined with simulated phishing attacks

✓ Reduce your organization's susceptibility to phishing attacks by up to 92%

✓ Helps you comply with ISO, HIPAA, PCI, GDPR, EU NIS, and Cyber Essentials

VALUE

✓ Secure your organization against the most common method of cyberattack while maintaining regulatory compliance

✓ Testing takes 8-10 minutes, helping to minimize impact on employee productivity

✓ Our experienced cybersecurity team combined with the power of proven security technology

Proven By Security Experts | Loved By Our Clients

"Reduces security risks by creating end-user awareness of critical security threats such as phishing emails. It can tailor the training specific to the employee's needs, rather than training the whole organization. Reporting employee security training is perfect for compliance requirements."
Marie T., CEO

"If you are looking for a diverse cybersecurity training platform, then look no further. With the simple ease-of-use, I can set up my whole year of security training in a day or two, and know that it will execute without fail."
John D., Software Engineer

Bolster your first line of cyber defense with behavior-driven employee awareness training. Our proven solution gives your organization a much-needed edge against hackers and ransomware.
