

SafeTitan for MSPs

Enterprise Grade Security Awareness Training (SAT) And Phishing Simulation For MSPs And Their SMB Clients.

Q1 of 2022 saw more than a million reported phishing attacks, according to the APWG's Phishing Activity Trends Report. That's the most phishing attacks that have ever been reported in a quarter!

MSPs can't underestimate the serious threat phishing presents. Cybercriminals use all kinds of scams, and any one of your customers can be a target! Empower your clients to defend against cybercrime with SafeTitan. SafeTitan is purpose-built for MSPs to deliver exactly what your clients need to guard against phishing threats.

Safetitan For MSPs Allows You :

- Offer affordable and scalable security awareness training to enhance your security stack, grow your security business and realize ROI.
- Offer a fully rebrandable solution to your customers – this is your solution offered by you the MSP.
- MSP Dashboard - View all quick actions and live analytics in one place with our MSP dashboard
- Provide phishing simulation, training, quizzes, videos, smishing and phishing reporting is a matter of couple minutes.
- Access to 1.8K+ phishing templates, 80+ Videos, trainings sessions & webinars.
- Easy to understand content in manageable pieces – never lasts more than 8-10 minutes.
- Mass campaigns & Training - no need to spend hours for selecting customers and assigning one-by-one. Select multiple and spin up a training or create a group of customers for future use.
- Schedule - create a campaign or training and schedule execution N times per week/month/year – no effort required, just enjoy the reporting outcome.
- SSO ready – no more annoying entering of logins and passwords.
- Direct Email Injection (Graph API) - phishing simulation emails delivered directly into user's mailboxes. No need to spend resources and time configuring allowed lists or firewalls.

Plus You Also Get

- Dynamic User Management - already have an active campaign and need to add additional users – no problem!
- Auto enrolment for risky clickers – if a predefined action is performed (i.e. user clicked a link in training phishing email) user is automatically assigned to a training simulation.
- Scheduled client reporting - configure reports in couple of clicks and enjoy new data weekly, bi-weekly, quarterly, bi-annually or annually.

Key Features

01 	02 	03 
Mass Campaigns & Training	Direct mail Injection (Graph API)	Scheduled Reporting

Why Safetitan For Your MSP?

- Simple Deployment & Scheduling
- Easily add SafeTitan to your technology stack to deliver security awareness training to your customers.
- Scale your security awareness offering profitably as you grow and acquire new security training clients.
- Effortlessly create and execute a campaign or training course and schedule for N times per week/month/year. Once scheduled the training will run until selected end date – no attention required.
- Direct Emails Injection (Graph API) - phishing simulation emails will be delivered directly into user's mailboxes. No need to configure allowed lists or firewalls.

Generate ROI

- Get phishing and training campaigns up and running in minutes and easily add more customers with our automated platform and courses.
- Mass Campaigns & Training - With SafeTitan you don't have to spend hours selecting customers and assigning training courses one-by-one. Select multiple customers and spin up a training course or simulation at once or create a group of customers for future course deployments.

Wide Ranging Security Course Selection

- Conduct powerful user training programs with an extensive line-up of engaging, animated training videos available in multiple languages.
- We care about quality. Each of our courses is hand made, verified and tested before publishing.

Always Up-To-Date

- New phishing simulations and training content added monthly, ensuring your customers training materials are always up to date with the latest threats.
- SafeTitan phishing simulations look exactly like the real thing, these are designed to fool even the savviest user.

Totally Rebrandable For Your Business

- White-label every aspect of the end users' training experience and keep your MSP's brand front and centre with custom URLs and your/your client's logo in the training portal and emails.
- Deliver a superior customer experience that can be white-labeled from start to finish.

Give Clients Control

- Give your customers access to manage their own campaigns and training.
- Dynamic User Management - if you already have an active campaign and need to add additional users – that's no problem! With SafeTitan your customer can easily add new users into active campaign.

Prove The Training Works

- Communicate training program results to the client via insightful, automated reports that prove the value of training.
- Results from simulations provide the evidence you need to convince any sceptics of the value of user awareness training.
- Adding user education training won't make your clients' security bulletproof, but it will produce measurable user behaviour changes that significantly reduce security risks and costs.
