Shield Bundle

All-in-One Protection for Email, Identity & Human Risk

The Sentriq Shield Bundle delivers unified cybersecurity protection by combining advanced email security, Microsoft 365 and Entra ID backup and recovery, and behavior-driven security awareness training. It's the ideal solution for businesses seeking to secure their digital environment, across email, identity, and users, from a single, integrated platform.

What's Included:

Advanced Email Security (MX + ICES)

» Dual-layer protection combining gateway filtering and API-level Microsoft 365 integration.

» Protects both perimeter and internal mailboxes.

» Augments Microsoft EOP and Defender for deeper threat detection.

Microsoft 365 & Entra ID Backup

» Automated backup for Exchange, OneDrive, SharePoint, Teams, and OneNote.

» Immutable, ransomware-resistant backups with granular restore options.

» Entra ID protection covers users, groups, roles, and policies, ensuring resilience from misconfigurations and accidental deletions.

Phishing Protection & AI-Based Threat Detection

» AI- and LLM-powered threat analysis to detect phishing emails and malicious URLs.

» High accuracy, catching threats that Microsoft may miss.

» Auto-remediation removes harmful emails post-delivery across tenants.

» Manual remediation also supported.

Security Awareness Training & Phishing Simulations

» Set-and-forget campaigns managed, no manual scheduling needed.

» Behavioral-based phishing simulations build a "human firewall."

» Launch training in minutes with pre-configured templates.

» Automated monthly reports track user progress and risk reduction.

Why Choose the Shield Bundle?

Feature	Benefit
Seamless M365 Integration	Works natively and via API with Microsoft 365 and Entra ID
Ransomware Resistant Backups	Immutable backup with point-in-time recovery
Next-Gen Phishing Defense	AI and curated threat feeds catch phishing attempts others miss
Human Risk Reduction	Training and phishing simulations reduce risky behavior
Simple Ease of Use	Built to ensure fast onboarding with an easy-to-use interface.

Technical Highlights

» Email Coverage: MX & API (M365), inbound/outbound/inter nal

» Phishing Detection: LLM, ML, sandboxing, curated feeds

» Backup Retention: Configurable by tenant or org policy

» Recovery Speed: Emails/files restored in seconds

» User Training: Delivered via cloud dashboard with monthly metrics
