

A.I. Powered Phishing Defense

100% Coverage of Existing Phishing Channels

Phishing remains the most common means of initiating a cyberattack, and no system can be truly secure without protection in place to defend against malicious links, zero-day attacks, and human error. Our solution is proven to identify and neutralize more dangerous links in emails which means greater protection for you and your organization.

**91% OF PHISHING
ATTACKS BEGIN
WITH A
MALICIOUS EMAIL**

- Protection against link-based email threats including ransomware, malware, and phishing
- A.I.-driven predictive analysis to identify suspicious URLs -- even if they're previously unknown
- Links are rewritten to provide real-time checks on every click and protect against user errors
- Unsafe links are blocked and users are warned about the potential threat

Hackers love phishing emails for one simple reason: **they work**. An accidental click is all it takes to expose your organization to data breaches, ransomware, fines, and downtime.

Rest easy with our proven anti-phishing solution protecting your users.

A Necessary Part of Layered Cyber Defense

Our Solution Checks Every Box

SAFETY

- ✓ Even trained employees often fail to recognize phishing emails -- our solution minimizes threats from human error
- ✓ Threats are detected in real time when a user clicks an email link
- ✓ Numerous dynamic checks are performed on linked pages, looking for spoofed sites, malware, redirects, and other dangers

SCANNING

- ✓ Real-time continuous updates from millions of actual users ensure thorough detection
- ✓ A.I.-driven, predictive detection fills in important gaps in user-targeted and bot-powered attacks
- ✓ 150% increase in unique phishing link detections

VALUE

- ✓ Closes critical gaps in traditional security strategies to protect against the most common threats
- ✓ No interruption to your organization's workflow or your team's day-to-day user experience
- ✓ The skills of our cybersecurity team combined with the power of proven, always-evolving technology

Proven By Security Experts | Loved By Our Clients

"We compared this product with four other products. Spam Titan, by far, produced the best results, provided the most insight into the system, had the best false positive rate and at such a great price it was hard to believe!"
Jennifer Hall, IT Director @ Investment Firm

"...way better detection rate, less false positives and false negatives than anything else I've worked with (and I've used several), and way less time managing quarantine."
Duke P., IT Supervisor @ Government Agency

"Work hours are not lost searching through spam emails to determine which emails are legitimate."
George Kajaia, IT Infrastructure @ Financial Services

"Geo-blocking is important for reducing our exposure; less spam saves everyone time."
Alex Walker, Manager @ Home Loan Firm

Human error remains the highest cause of successful phishing attacks worldwide, as 97% of users fail to identify phishing emails.
